

Product code: CS15t-60

Description: 787B chassis AW compatible EVO6

New product / replacement: New

- New chassis for Mazda Group C. The main innovations are:
 - compatible with EVO6 anglewinder motor mounts
 - the plastic bushings of front axle may be substituted with either grub screws or brass bushings code CH56
- The 6-screws chassis is not compatible with the Mazda models before the CA15c, as originals. The older bodies must be made compatible with the EVO6 chassis by using the two updated car sides (included in this pack).
