

Product code: MN13ch

Description: FLAT-6 S, 22500 rpm, 230 g*cm, 12.5 W, different opening case

New product / replacement: New

Slot.it has further improved the revolutionary concept of the Flat-6 motor. Two new versions are now available of this compact and lightweight long can engine. Both of them have been improved in torque, power and braking force, by using a new kind of steel.

The milder evolution is the FLAT-6 S, which has an orange label.

The other great innovation is the case with two different openings, allowing to switch between lower or higher magnetic traction. The 'S' is designed to give a moderated magnetic effect.
